-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 July 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 18, 2007 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 23-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over "Zithromax", 70-5191-00-8 (PFIZER LABS, Division of Pfizer Inc., NY, NY 10017 (October 2003)) in combination with Singer et al (U.S. Patent No. 6,365,574).

"Zithromax" discloses a method for producing a composition suitable for intravenous injection comprising azithromycin in lyophilized form in combination with citric acid and sodium hydroxide but does disclose the addition of ethanol. However, since a composition of ethanolate of azithromycin was well known in the art at the time the present invention was made as disclosed by Singer et al (see, for example, column 3, lines 1-36), a person having ordinary skill in the art at the time the present invention was made would have been motivated to prepare the composition disclosed by Singer et al in the form of Zithromax in order to make it suitable for intravenous injection.

Applicant's arguments filed July 18, 2007 have been fully considered but they are not persuasive.

Applicant contends that neither Zithromycin nor Singer describes the conditions under which a lyophilized formulation of azithromycin is produced. This argument has not been found persuasive since it would have been obvious to a person having ordinary skill in the art at the time the claimed invention was made to vary the standard lyophilization conditions in order to prepare a lyophilized product using a specific compound.
